# INTRODUCTION

## Early American Coinage

The first mint established in this country was authorized by the General Court of Massachusetts in 1651 and began operation in Boston the following year. The NE, willow, oak and pine tree coins were the product of this mint. The Bermuda coinage antedates the above by over thirty years but could hardly have had any circulation in the colonies.

In 1658 the Lord Baltimore coins were planned for Maryland but never achieved any circulation as they were all short weight.

William Wood received a Royal Grant to strike copper coins for use in the colonies and his Rosa Americana pieces undoubtedly had some circulation here as well as his Hibernia halfpence which were not accepted in Ireland.

After the Revolution several of the states established their own mints, those of New Jersey and Connecticut having quite an extensive coinage of great interest to present day collectors.

The various experimental and trial pieces speak for themselves as little is known about them, except that a large proportion of them originated in England, evidently as an effort to secure contracts for the preparation of dies for a new coinage.

Considerable information is given under "Notes on the Various Denominations."

## Establishment of the Mint

The United States Mint was established in Philadelphia by an act of Congress dated April 6, 1792 and began operations in March of the following year.

The cents and half cents were struck in 1793, the silver dollar, half dollar and half dime in 1794 and the eagle and half eagle in 1795. In 1796 the quarter eagle, quarter dollar and dime were first coined. The eagle was the gold unit and had a standard weight of 270 grains, with a fineness of  $916\frac{2}{3}$ . The dollar was the silver unit and had a standard weight of 416 grains with a fineness of 892.4. The other gold and silver coins were in proportion. It was soon discovered that these units were undervalued and either being exported or sold as bullion, therefore in 1804 the coinage was stopped, only the smaller coins being continued. The law of 1834, amended in 1837, reduced the weight of the eagle to 258 grains of a fineness of 900 and this new coin was first issued in 1838. The law of 1837 reduced the weight of the silver dollar to  $412\frac{1}{2}$  grains also of a fineness of 900. The law of 1834 having placed too low a valuation on silver many of the fractional coins were sold for bullion so that the law of 1853 reduced the weight of the half dollar to 192 grains making all the fractional silver coins subsidiary.

The act of 1873 made necessary an increase in the weight of the half dollar to 192.9 grains in order to conform with the authorized weight of 12.5 grams.

## Private Gold Issues

The gold coins struck by private assayers and mints in the United States form one of the most interesting series in the numismatics of our country. The first of these were issued by Templeton Reid, who established a mint near the gold mines in Lumpkin County, Georgia. The next coins were those struck by the Bechtlers, Christopher and August, from 1831 to 1842 or later. Their mint in Rutherford, N. C., struck pieces from the gold of Georgia and North Carolina to the amount of over two million dollars.

Upon the discovery of gold in California and the influx of prospectors and traders there was an immediate need for a medium of exchange other than the unwieldy bags of gold dust. Several firms struck coins in 1849 and the State Assay Office of California, with Frederick D. Kohler as State Assayer, began stamping ingots early in 1850; a few of these still exist. In the latter part of 1850 the firm of Moffat & Co. was designated as United States Assay representatives and Augustus Humbert of New York was appointed United States Assayer to place the government stamp upon the ingots produced by Moffat & Co. This business was in 1852 conducted under the name of the United States Assay Office.

The Mormon coinage grew out of the same necessity and appeared early in 1849. It did not, however, compare with the California coinages in actual intrinsic value. The firm of Clark, Gruber & Co. in Denver coined gold from the Colorado mines and produced over \$500,000 worth in 1860 and 1861. The Parsons and Conway companies were much smaller operators.

Way up in Oregon the same need for a medium of exchange produced the two pieces struck by the Oregon Exchange Co. in 1849.

## **Pattern Coins**

The section on pattern coins is omitted from this catalogue. During the last few years we have gradually built up the entire series. It has now grown to such a proportion that we plan to complete and publish as a separate work. Further announcement will be made later.

## **General Information**

Collectors are urged to consult this feature in the catalogue. Many questions brought up by new collectors will be satisfactorily answered by the information available.

## **Notes on the Various Denominations**

This section of the catalogue has proved very popular. Collectors are urged to express desires for further notes. During the year any suitable new information will be published in the Coin Collector's Journal. A section dealing with the restrikes of United States coins has been added and should prove most helpful.

## **Editor's Note**

The market for all classes of United States Coins has improved greatly in the last few months. Minor coins and silver dollars are very popular. Proofs have advanced considerably over last year and bring very good prices in auction sales, few dealers have any sort of a stock of silver proofs and gold proofs are seldom obtainable. The first and last dates of a type seem to be much in demand.

Commemorative half dollars are in demand again and outside of the long sets are bringing higher prices. Definite types are the most popular.

The editor wishes to thank John J. Ford, Jr. and Homer Downing for revisions and additions to "Notes on the Various Denominations". Many other collectors and dealers have been most helpful in supplying information and suggestions. The values quoted in this catalogue are believed to fairly represent the present market.

WAYTE RAYMOND.

# EARLY AMERICAN COINS

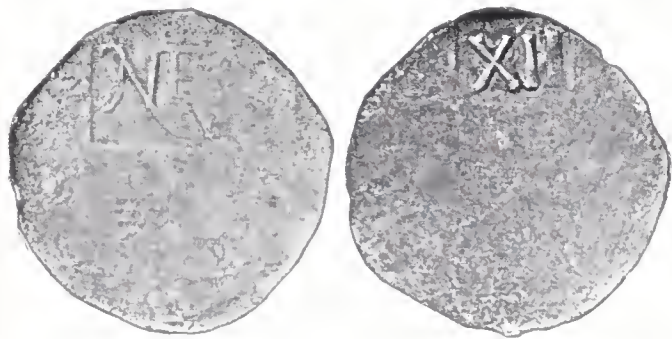

## COINS OF THE COLONIES

### MASSACHUSETTS

Mint established in Boston, 1652

The first mint in the Colonies was operated by John Hull without royal license. The General Court of Massachusetts Colony, in an order dated May 27, 1652, authorized the coinage of shillings, sixpences, and threepences, and fixed Hull's fee at one shilling out of every twenty coined. The mint was located in the rear of Hull's residence in Boston and operations began in the same year.

#### The N E Coinage

	Good	Fine
N E Shilling .....	150.00	250.00

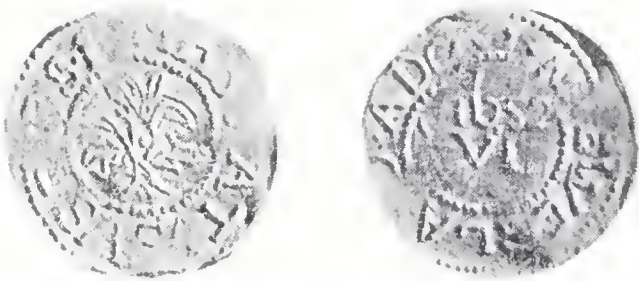

#### Willow Tree Coins

	Good	Fine
1652 Shilling .....	150.00	300.00

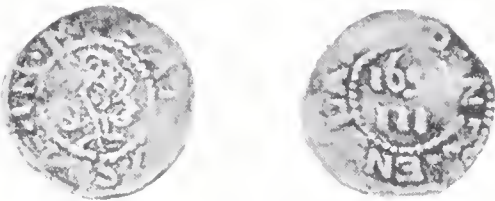

N E Sixpence .....	600.00
--------------------	--------

1652 Sixpence .....	200.00	350.00
---------------------	--------	--------

N E Threepence .....	750.00
----------------------	--------

1652 Threepence .....	750.00
-----------------------	--------

Crosby notes several varieties of the shilling and there are varieties of the sixpence. All are rare.

EARLY AMERICAN COINS

Oak Tree Coins

Pine Tree Coins

		Good	Fine
1652	Shilling	25.00	50.00

		Good	Fine
1652	Shilling. Large size	25.00	40.00

1652	Sixpence	25.00	40.00
------	----------	-------	-------

1652	Shilling. Small size	20.00	30.00
------	----------------------	-------	-------

1652	Threepence	20.00	30.00
------	------------	-------	-------

1652	Sixpence	20.00	30.00

1662	Twopence	12.50	25.00
------	----------	-------	-------

1652	Threepence	20.00	30.00
------	------------	-------	-------

The Crosby tables give eleven varieties of the shilling, eight of the sixpence, six of the threepence and three of the twopence.

Crosby gives twenty-seven varieties of the shilling, two of the sixpence and four of the threepence.

EARLY AMERICAN COINS

Good Samaritan Shilling

1652 Shilling. Very rare.

Good      Fine

Copper Penny. Very rare.

MARYLAND

Coinage of Lord Baltimore 1659

Lord Baltimore, who received his Maryland Charter in 1632, found tobacco an unsatisfactory currency and, in 1659, had a quantity of coins struck in London and sent to his brother Philip Calvert, in Maryland. In a letter of instructions he requested that the coins not be imposed upon the people without their consent.

Good      Fine

Shilling ..... 75.00    125.00

Sixpence ..... 50.00    75.00

Fourpence or groat ..... 100.00    150.00

CANADA

Coins authorized by Louis XIV

1670    15 Sous ..... 350.00    600.00

1670    5 Sous ..... 20.00    30.00

1670    Double. Copper. Extremely rare.

## EARLY AMERICAN COINS

### FRENCH COLONIES

#### In General

During the reign of Louis XV the first foreign coppers were sent to America. They were struck in Rochelle and Rouen in 1721 and 1722. The 1767 Sous were struck in Paris and afterward countermarked RF under the Republic.

		Good	Fine
1721 Sou. M.m. H			
(Rochelle)	1.50	3.50	
1721 Sou. M. m. B			
(Rouen)	10.00	35.00	

1722 Sou. M.m. H	1.50	4.00
------------------	------	------

1767 Sou.	1.50	3.50
1767 Sou. Countermarked RF.	1.25	3.00

### NEW JERSEY

Coins brought from Ireland by Mark Newby in 1681, known as "St. Patrick halfpence."

Halfpenny	10.00	20.00
-----------	-------	-------

	Good	Fine
Farthing	2.50	5.00

There are many die varieties of these coins and the farthing comes struck in silver and gold.

### FLORIDA

James II (1685-1688). Plantation token

This token has been variously said to have been issued for Virginia and Florida, but the better view seems to be that it was struck for general circulation in the Colonies.

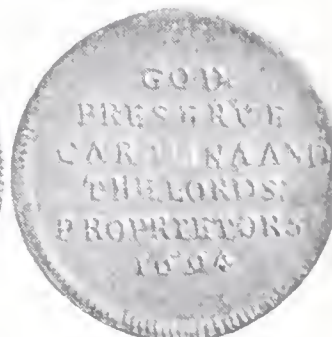

20 Part Real. Pewter	7.50	12.50
----------------------	------	-------

### ELEPHANT TOKENS

Little is known of the history of any of these pieces but it has been conjectured that the Carolina Token was intended for use by the Carolina Company, the New England Token by the New England Company, and the London Token by the London Company. The legend of the latter, however, probably refers to the City of London.

### CAROLINA

1694 Elephant halfpenny	50.00	100.00
-------------------------	-------	--------

	Good	Fine
1694 Halfpenny PROPRIETERS	100.00	250.00

NEW ENGLAND

1694 Halfpenny. Very rare.

LONDON TOKEN

(1694) Halfpenny	3.50	7.50
------------------	------	------

NEW YORKE IN AMERICA

Little is known of the first token associated with New York's history. An opinion has been expressed, however, that it was of Dutch origin and intended as a tradesman's token.

(1700) Token in lead or brass	50.00	100.00
-------------------------------	-------	--------

THE ROSA AMERICANA COINS

These coins were struck by William Wood under a patent obtained in 1722 from George I. There were rumors current that it was granted through the intercession of King George's mistress who profited by the deal. The patent was for fourteen years but the coins were struck only during 1722 and 1723. They were of Bath metal, a mixture of silver, tutanaigne and brass, and 16 ounces of the metal were required to coin 30 twopence, 60 pence, or 120 halfpenny pieces.

The unpopularity of these attractive coins was due apparently to either their metal or to the arrangement made with Wood for their coinage, rather than to their appearance.

	Good	Fine
Twopence without date	3.50	10.00

1722 Twopence	4.00	10.00
---------------	------	-------

1722 Penny	2.50	5.00
------------	------	------

WOOD'S COINAGE

Rejected in Ireland, sent to America.

George I, without first consulting the Irish Privy Council, also granted William Wood a fourteen-year patent in 1722 to provide minor coins for Ireland. These were issued in 1722, 1723, and 1724 but were extremely unpopular because of political reasons and Jonathan Swift, in his *Drapier Letters*, hastened their final rejection.

1722 Halfpenny ..... Good      Fine  
3.50      7.50

1723 Twopence ..... 5.00      7.50

1723 Penny ..... 3.00      5.00

1723 Halfpenny ..... 3.50      7.50

1733 Twopence. Very rare.  
There are several Rosa Americana patterns, all very rare.

1722 Halfpenny ..... Good      Fine  
1.50      3.50  
First type.  
1722 Halfpenny ..... 3.50      7.50  
Type of 1723.

1723 Over 22 Halfpenny... 5.00      10.00  
1723 Halfpenny ..... .50      1.00  
1723 Farthing ..... 1.00      1.50  
1724 Halfpenny ..... 2.00      4.00

1724 Farthing ..... 2.00      4.00  
There are many die varieties of these coins, also several patterns.

## CONNECTICUT

Copper coins struck by John Higley at Granby.

From 1737 to 1739, inclusive, John Higley, a copper mine owner of Granby, Connecticut, struck copper tokens for local use to supplement the few minor coins in circulation. The copper he used was so pure that his pieces soon wore smooth and specimens in excellent condition are difficult to find.

		Good
1737	Threepence. Three hammers	100.00

1737 Threepence. I am Good	
Copper .....	100.00

(1737) Threepence. Broad Axe.....125.00

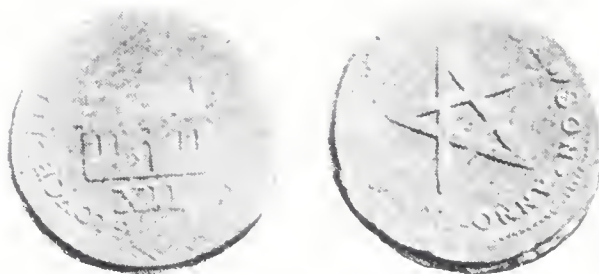

(1739)	Threepence. Broad Axe.....	250.00
--------	----------------------------	--------

Threepence. Wheel design. Unique

## VIRGINIA

1714 Gloucester shilling. Ex. rare  
Brass Token issued by one Richard  
Dawson.

	Fine	Unc.
1773 Halfpenny. Mint state	2.00	5.00
Sometimes comes struck on a larger flan and known as a "penny."		

1774 Shilling. Silver. Very rare.

COINS OF THE STATES

VERMONT

Vermont, the first state to mint coppers, passed an act on June 15, 1785 granting to Reuben Harmon Jr. the exclusive right to mint the following coins. The mint was located in Rupert and impressions were made by means of an iron screw, attached to heavy timbers above, which was moved by hand with the aid of ropes.

1785 Cent. VERMONTS      Good      Fine  
5.00      17.50

1786 Cent. Bust left      Good      Fine  
12.50      50.00  
1787 Cent. Same obverse      25.00      75.00

Reverse always poor, date not showing.

1786 Cent. Baby head      3.50      17.50  
There are die varieties of the above pieces.

1788 Cent      2.50      5.00

CONNECTICUT

In 1785 Samuel Bishop, Joseph Hopkins, James Hillhouse, and John Goodrich were authorized to establish a mint and strike copper coins. They formed a partnership with others and started minting operations in New Haven, but closed down in 1788. Coins weighing 28,944 pounds were passed by the Board appointed to inspect the products of the mint.

1785 Cent. Bust r. .... Good 2.00 Fine 3.50

## COINS OF THE STATES

		Good	Fine
1788	Cent. Draped bust l.	2.00	3.50
1788	Cent. INDL ET LIB	2.50	5.00

The Connecticut cents have been the subject of much numismatic research and there are a wide variety of dies. Crosby gives over one hundred combinations, many of which may be subdivided.

### KENTUCKY

The Triangle token, originated in Lancaster, England, but little is known concerning the Myddelton tokens. The only claim of the first token to Kentucky is the fact that the top star is stamped with a K.

		Fine	V. Fine
(1790)	Cent. Plain edge	3.00	5.00
	Cent. Lettered edge	4.00	7.50
	Cent. Engrailed edge	10.00	20.00

1796	Myddelton token. Silver	75.00
1796	Same in Copper	60.00

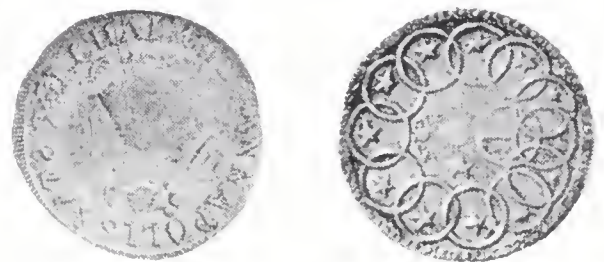

This token usually comes in proof condition.

### MARYLAND

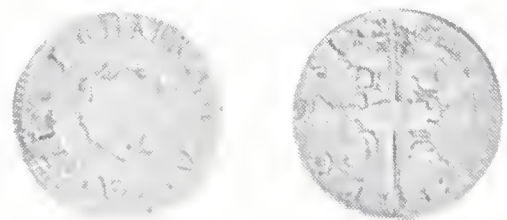

Chalmer's tokens were issued by John Chalmers, a goldsmith of Annapolis, Maryland, in 1783. The Baltimore Town threepence made its appearance in Baltimore, Maryland, in 1790. It was struck by Colonel Standish Barry, who was a soldier in the Revolutionary War at the age of sixteen, and his portrait appears on the obverse.

		Good	Fine

1790	35.00	75.00

Standish Barry Threepence.

	Good	Fine
1787 Half Cent	3.00	5.00

MASSACHUSETTS

In 1786 the Massachusetts Legislature authorized a mint to coin gold, silver, and copper coins, but only the latter were struck. Because of the difficulty in getting machinery and materials, the coins cost the State of Massachusetts over two cents for each cent minted, and more than one cent for each half cent. Both of the earlier pieces are believed to have been patterns designed by Paul Revere.

1788 Cent	2.00	3.50
-----------	------	------

1776 Halfpenny. Three heads.  
Rare.

1788 Half Cent	3.00	5.00
----------------	------	------

There are numerous die varieties of the cents and a few of the half cents.

NEW HAMPSHIRE

In June, 1776, the New Hampshire House of Representatives authorized copper coins, specifying the device and legends appearing in the pattern illustrated, but for some unknown reason no regular coinage materialized. The illustrated piece is apparently a pattern for the authorized coinage.

1776 Cent. Pine Tree. Rare.

1787 Cent	2.00	3.50
-----------	------	------

1776 Cent. Very rare

NEW JERSEY

An act was passed by the New Jersey legislature on June 1, 1786 authorizing the coinage of copper coins. Two mints were subsequently established, one near Morristown and the other in Elizabethtown, and both were in operation until the Federal constitution was adopted in 1788. The Morristown mint was operated by Walter Mould in his home, about two miles west of Morristown, while the coinage at the Elizabethtown mint was conducted by Albion Cox and Gilbert Cindle in a home known as the "Old Armstrong House."

Although all the "horse and plow" New Jersey cents of the regular issue are of a single type, there are enough varieties to satisfy the most enthusiastic collector.

1786 Cent. Very rare  
Date under plow-beam. Two varieties.

# COINS OF THE STATES

## NEW YORK

New York state had no official colonial mint, but a private one was in operation at Machins Mill, in Ulster County. The Excelsior and Non Vi Virtute Vici cents are attributed to Thomas Wyon of Birmingham, England. The history of the Immunis Columbia, George Clinton, Liber Natus Libertatem Defendo and Nova Eborac cents is very obscure and unreliable.

The Mott and the Talbot, Allum and Lee tokens were issued by two New York firms as tradesmen's tokens to relieve the shortage of good copper coins in circulation. The Theatre at New York penny is one of a series of English tokens.

Punch on breast. GOLD.

### CASTORLAND

A French colony established at  
Carthage, N. Y.

This was apparently an honorarium given to officers of the company in charge of the French settlement, Castorville, in New York, for attendance at board meetings, but may have been in circulation. Modern copies may still be obtained at the Paris mint.

Penny. Theatre at New York 35.00 50.00

### EPHRAIM BRASHER'S DOUBLOON

Most of the colonists were so poor they had little need for a gold coinage, but it was desirable for the larger business transactions so Ephraim Brasher, a New York goldsmith, struck a gold piece in 1787. These were worth \$16 at that time, but are now extremely rare and valuable.

1796 Half dollar .....	Unc. 7.50
Silver restrike.	
1796 Same .....	3.50
Copper restrike.	

Originals of this coin, struck on a thick flan with milled edge, are very rare.

### RHODE ISLAND

This token, evidently of Dutch origin, shows Admiral Howe's flagship on obverse and troops landing on reverse.

1787 Doubloon. Ex. rare  
Punch on wing. GOLD.

-----------------	-------

## THE FUGIOS

The Fugio cent was the first coin struck by authority of the United States, but it was minted by James Jarvis under a contract with the government. The Federal Congress specified that three hundred tons of these pieces be struck, and Jarvis purchased some of the copper which he used from the government.

Congress specified the design appearing on both the obverse and reverse of these cents. The legend and the obverse is literally translated "I [time] fly, therefore mind your business." Franklin doubtless influenced the adoption of the design and legend in its general form, although there is no record that he personally originated either of them.

Good Fine

1787 Cent .....100.00

UNITED above, STATES below.

There are several rare patterns of the Fugio cent.

## IMMUNE COLUMBIA

These pieces are very rare and were struck in gold, silver, and copper, an indication that they were patterns for coins to be struck from any of those metals. They are of English origin.

## MISCELLANEOUS TOKENS

1785 Cent. Vermont  
obverse .....

	Good	Fine
25.00	75.00	

1785 Cent. Large circle of stars

There are two obverse dies of this variety. This reverse also comes combined with the rare New Jersey obverses — Immunis Columbia, eagle, Washington. A poor specimen is also known muled with the reverse of the 1785 Nova Constellatio cent. All of these coins are of extreme rarity.

1785 Cent. George III  
obverse .....

25.00	75.00
-------	-------

## CONFEDERATIO CENTS

These were also patterns and are believed to have been made by Thomas Wyon. It is very likely that all of them, except those muled with the New Jersey cents, were struck in England. One of these pieces was found in Berlin, Connecticut, in 1861 when some workmen were digging up an old drain.

1785 Cent. Small circle of stars

This reverse is also known combined with the 1787 New York eagle cent. It is extremely rare.

## MISCELLANEOUS

The Georgius Triumpho and Auctori Plebis tokens both have many characteristics of the Bungtown tokens which were so plentiful in the colonies. The Pitt token was perhaps struck originally as a medal, but was popular and subsequently used as currency. The Franklin piece was an English token.

The Bar Cent is believed to have been struck in England as a pattern for a United States coinage. The monogram on the obverse, composed of the letters U S A, was taken from the design appearing on a button of an old Continental uniform.

WASHINGTON PIECES

WASHINGTON PIECES

This series is a very popular and interesting one because of the tribute paid to the father of our country. Most of them were designed and struck in England, and many were apparently intended for the American market. The only pieces struck in this country were the 1792 half dollars designed by Peter Getz of Lancaster, Pa.

### Jacob Perkins Pattern Dollar

Dollar designed by Jacob Perkins of Newburyport. Silver. Very rare.

SOMMER ISLANDS

(BERMUDA)

Settled by Sir George Somers in 1609.

The Bermuda Islands were once named **Sommer** in memory of Sir George Sommers [or Somers] who was shipwrecked there. James I granted a charter to certain English colonists residing on the islands which included the privilege of issuing coins "to pass currant" among the inhabitants. In 1616 the governor of the Islands learned that certain "base coyne" was being sent from England.

	Good	Fine
Shilling .....	100.00	175.00

Sixpence .....	50.00	100.00
Threepence .....	150.00	250.00
Twopence .....	50.00	125.00

These coins are struck in a brassy composition and were probably originally lightly silvered.

EARLY MINT ISSUES

Struck during 1792 and without doubt actually circulated as they are found in all degrees of condition.

The Mint Act of April 2, 1792 authorized the establishment of a mint at Philadelphia, and on July 31st of the same year a plain brick building was erected for that purpose. It had the distinction of being the first building erected for public purposes by the United States. The above act directed the Chief Justice of the United States, the Secretary and the Comptroller of the Treasury, the Secretary for the Department of State, and the Attorney General, to make annual inspection of coins struck at the Mint.

The Mint began operations in a small way in 1792 by striking half dismes; tradition has it that the silver for this coinage was from Washington's personal silverware. The regular copper coinage of cents and half cents started in 1793, silver in 1794, and gold in 1795.

Good      Fine

1792    Half Disme. Silver    75.00    125.00

## PRIVATE GOLD COINS

5 Dollars 1850—Weight 111 gr. .... V. Fine 100.00

5 Dollars 1860—Weight 116 gr. .... V. Fine 200.00

The Mormons established their mint to coin the large quantities of gold dust received from California. All the coins were short weight in comparison with the regular U. S. coinage. The 20 Dollar piece was the first coin of this denomination to be struck in the country. It had an intrinsic value of only \$16 to \$18. The letters G.S.L.C.P.G. = "Great Salt Lake City Pure Gold."

1861	Cent. Copper-nickel .....		100.00

In 1861 the Confederate government took over the New Orleans mint and prepared a die for a half dollar. It is said that four specimens were struck from this die using the regular 1861 obverse. Only two pieces are known to exist. Many years after the Civil War the die of this coin was discovered and eventually bought by Mr. J. W. Scott. Mr. Scott purchased about 500 half dollars of 1861 and had the Confederate die impressed upon the reverse after it had been planed off. These coins are the pieces known as "restrikes." At the same time Mr. Scott struck about 500 pieces in white metal with the Confederate impression on one side and his advertisement on the other.

The cents were a speculative issue designed by Geo. H. Lovett, a medallist and die sinker of New York City.

# GENERAL INFORMATION

## United States Mints

Philadelphia. Established 1792. No mint mark.  
Charlotte, N. C. Established 1838. Closed 1861. Mint mark—C. Gold only.  
Dahlonaga, Ga. Established 1838. Closed 1861. Mint mark—D. Gold only.  
New Orleans, La. Established 1838. Closed 1909. Mint mark—O.  
San Francisco, Cal. Established 1854. Mint mark—S.  
Carson City, Nev. Established 1870. Closed 1893. Mint mark—CC.  
Denver, Colo. Established 1906. Mint mark—D.

## Mint Marks

The Philadelphia mint coins do not have any mint marks.

The only exception is that of the new composition 5 cent piece coined from 1942 to 1945.

Other marks are found as follows—

Indian head cents—under the wreath.

Lincoln cents—under the date.

Liberty head nickels—under period at left of CENTS.

Buffalo nickels—under FIVE CENTS.

Jefferson nickels 1938-42 at right of building. 1942 to 1945—large letter above building. 1946 to 1950 same as 1938-42.

Silver Three Cents—1851. O only. O opposite opening of C.

Half Dimes—under value or under wreath.

Dimes—under value or under wreath. From 1916—at left of fasces. 1946—at left of torch.

Twenty Cents—under eagle.

Quarter Dollars—under eagle. After 1916—at left of date. After 1932—under eagle.

Half Dollars—1838 and 1839 O. The O over date. After 1840—under eagle. 1916, 1917—On obverse over motto. After 1917—On left part of reverse near edge. 1948—over Liberty bell.

Silver Dollars—under eagle. After 1921—near eagle's wing on left part of reverse.

Trade Dollars—under eagle.

Gold Dollars—under wreath.

Quarter eagles—1838, 1839 over date. 1840 to 1907—under eagle. 1908 to 1929—near border on lower left part of reverse.

Three Dollar Pieces—under wreath.

Half eagles—1838, 1839 over date. 1840 to 1908—under eagle. 1908 to 1929—near border on lower left part of reverse.

Eagles—under eagle. After 1907—at left of value.

Double eagles—under eagle. After 1907—above date in rays.

The size of mint marks varies greatly, particularly on the early S coinage. CC mark is apt to be uneven and also varies in size. The placing of mint marks also makes additional varieties.

## Mottoes On Our Coins

The motto "E Pluribus Unum" first appears on the half eagle of 1795 being featured on the scroll above eagle, as copied from the Great Seal of the United States. "In God We Trust" first appears in 1864 when the Civil War had stirred up a great religious sentiment in the country.

## Signatures on Coins

The mint engraver, J. B. Longacre, placed his initials on the double eagle of 1849 and on the Three Dollar piece issued in 1854, in both instances on the truncation of the neck. The 1864 and subsequent issues of the bronze cent have L on the ribbon hanging from bonnet.

The engraver, Geo. T. Morgan, placed an M on both sides of his design for the silver dollar of 1878. This shows on the truncation of the bust and on the wreath ribbon of reverse.

Charles E. Barber engraved a B on the truncation of the Liberty head on the 1892 silver dime, quarter and half dollar. The 1907 double eagle bears the initials A S G (Augustus St. Gaudens) under the date although he did not sign the eagle.

The new 1908 coinage of quarter and half eagles shows the initials B.L.P. (Bela L. Pratt) under the Indian head. The 1921 Peace dollar has the letter F under the head (Anthony de Francisci). The 1916 half dollar bears the initials of A. A. Weinman in monogram in the lower field of the reverse, also on the obverse of the dime.

The letter M appears at the base of the right portal on the 1916 quarter dollar and is the initial of Herman MacNeil.

James E. Fraser, the designer of the buffalo nickel placed an F under the date.

The Lincoln Cent of 1909 had the initials V.D.B. (Victor D. Brenner) on the reverse but being rather conspicuous they were removed before the end of the year, but later replaced under the shoulder in 1918.

J. R. Sinnock, the mint engraver placed his initials JS on the Roosevelt dime and JRS on the Franklin half dollar.

### Arrows At Date

The arrows on either side of date on coins of 1853, 1854 and 1855 indicate the reduction in weight while those on the coins of 1873 and 1874 indicate the slight increase.

### Drapery on Figure of Liberty

It will be noted from the various illustrations of the silver coins 1839 to 1841 that one variety has the elbow quite free while the other has a much more extensive drapery covering the entire elbow. Other differences also occur.

### The Condition of a Coin

**PROOF**—Specially struck coins with a mirror-like surface sold to collectors at the United States Mint.

**UNCIRCULATED**—A new coin showing no evidence of circulation, although not necessarily brilliant.

**VERY FINE**—Showing only slight evidence of circulation.

**FINE**—Showing slight sign of wear but still an attractive piece.

**VERY GOOD**—Showing more or less wear but lettering clear and plain.

**GOOD**—Showing greater wear with higher parts of design partially gone.

**FAIR**—Considerably worn and type does not all show.

### Proof Coins

Proof coins, in all metals, were first struck at the Philadelphia mint for collectors in 1858. They have a mirror-like surface unlike the regular issues. All such pieces were originally sold at a premium. The U. S. mint abolished this practice in 1915 but resumed it again in 1936. Sets were struck from 1936 to 1942 and once again in 1950.

### Valuations Quoted

Condition governs the price of a coin and some pieces are rarely met with in fine state; for this reason there may be a wide variation in price between good and fine preservation. This is especially true of the early American pieces and the first types of cents and half cents. An attractive color and appearance also adds to the value of such coins.

# NOTES ON THE VARIOUS DENOMINATIONS

## Early American Coins

To the collector who acquires a really scientific interest in this series Crosby's "Early Coins of America" is the only standard work and the seventy five years since its publication have added very little to the general knowledge of the subject.

A reprint was made in 1945.

Numerous supplementary works are available, many of which are highly specialized.

The following are among the most interesting—

Massachusetts Colonial Silver. By Carl Wurtzbach. 1937.

The New England and Willow Tree Coinages of Mass. By Sydney P. Noe. A.N.S. Monograph No. 102. New York 1943.

The Oak Tree Coinage of Mass. By Sydney P. Noe A.N.S. Monograph No. 110. New York 1947.

The Coinage of William Wood. By P. Nelson. Brighton, U.K. 1903.

The Virginia Coinage. By Charles T. Tatman. 1894.

The Vermont Coinage. Vermont Historical Society. By Edmund F. Slafter. 1879.

The Copper Coins of Vermont. By John M. Richardson. 1947.

A Descriptive List of the Coppers issued by Authority for the State of Connecticut for the year 1787. By Dr. Thomas Hall. Boston 1892.

The State Coinage of Connecticut, Vermont and Massachusetts. By Miller-Ryder. New York 1920.

Coins of New Jersey. By Dr. Edward Maris. Philadelphia 1881.

Castorland. (Bulletin des Recherches Historiques, August 1938) By Victor Morin. 1938.

The Medallie Portraits of Washington. By W. S. Baker. Philadelphia 1885.

American Numismatic Manual. By Dr. M. W. Dickeson. Philadelphia 1865.

Many Pamphlets and Auction Sale Catalogs are available which contain additional detailed information.

Dollar valuations are very difficult to place upon many of the major rarities in this series. Currently, many pieces are offered at prices considerably below the record amounts paid for identical specimens several years ago.

**MASSACHUSETTS SILVER.** The simple design of the N.E. pieces invited counterfeiting and edge clipping which resulted in their replacement by the Willow, Oak and Pine Tree series. One Thomas Wyatt, of New York City, struck clever copies or fabrications of several Massachusetts Silver pieces shortly before the Civil war.

The "Set" of Wyatt fabrications consists of the N.E. Shilling and Sixpence, an Oak Tree Shilling, Pine Tree Sixpence, Pine Tree Threepence, a large Twopence resembling the Oak Tree Shilling and dated 1652, and a "Penny" unlike any of the Oak, Pine or Willow Tree coins. Wyatt also reproduced the Good Samaritan Shilling. Specimens of the eight varieties exist in both Silver and Copper.

Several other fraudulent copies or imitations of Massachusetts Silver coins are known in addition to those manufactured by Wyatt. Some are struck over other coins.

**LORD BALTIMORE COINAGE.** At least two die varieties are known of the Maryland Shilling. Two varieties of the Sixpence are known. One has *MVLTIPPLICAMINI* upon the reverse, the other *MVLTILICAMINI*, the "P" being omitted.

Two varieties of the Groat are known, one having a larger head and shield than the other. Both the Shilling and Sixpence exist in Copper and are Ex. Rare.

The Lord Baltimore Penny is considered Unique and was in the Mickley, Bushnell and Parmelee cabinets. A storecard of W. Idler, an early dealer, with the address removed closely resembles the Penny.

**FLORIDA PLANTATION TOKEN.** The 1/24 Part Real in Pewter has possibly been restruck from the original dies.

**ELEPHANT TOKENS.** J. A. Bolen, a die sinker of Springfield, Mass.,

struck copies of the Carolina (Proprietors) Halfpenny. The New England Halfpenny was rather crudely reproduced by A. S. Robinson.

The London Halfpenny token is found on both thick and thin planchets. Records exist of a specimen in brass.

**ROSA AMERICANA AND WOOD'S COINAGE.** Numerous Patterns exist of both series, together with a large number of die varieties. For instance, the 1722 Halfpenny is found with a **GEORGIUS D G REX** Obverse and a **ROSA AMERI UTILE DULCI** Reverse as well as the more common **GEORGIUS DEI GRATIA REX** Obverse and the **ROSA AMERICANA UTILE DULCI** Reverse. Impressions from the regular dies in Silver are known of several types.

**HIGLEY COINAGE.** Bolen struck rather modern copies of the 1737 Threepence. (Three Hammers, Connecticut variety.) They are not likely to deceive unless well worn.

**VIRGINIA.** The Halfpenny of 1773 struck on a larger planchet and sometimes called a "Penny" is always found in Proof condition with a completely milled border. We believe it to be a trial piece for the regular coinage which was issued under a Royal Warrant dated May 20th 1773. A set of dies for the Halfpenny exists in the Museum of the Royal British Mint. The regular Halfpennies are common in Uncirculated condition because of a hoard discovered by Col. Cohen of Baltimore many years ago.

A specimen of the Shilling is said to be known in Copper.

**VERMONT.** Many die varieties exist of these Cents and represent an extensive study in themselves.

**CONNECTICUT.** A much larger number of dies were used to strike the Connecticut Cents than were used for the Vermont coins. Coppers from either state are rare in choice preservation. Fine impressions on perfect planchets are decidedly uncommon.

**KENTUCKY.** The "Engrailed Edge" variety of the Triangle token actually has an obliquely reeded edge. This token or cent also supposedly exists in Silver with a plain edge. The lettered edge variety bears the inscription **PAYABLE IN LANCASTER LONDON OR BRISTOL**. The Clay collection contained a specimen with a lettered edge reading **PAYABLE AT BEDWORTH**, etc.

The Myddelton pieces were struck by Boulton and Watt at their mint near Birmingham and were undoubtedly Patterns for a British Colonization Society. Mules exist of the reverse of this piece combined with the obverse of the Copper Company of Upper Canada Halfpenny.

**MASSACHUSETTS.** A rare variety of the 1787 Cent has the arrows in the left talon of the Eagle upon the reverse rather than in the right.

**NEW JERSEY.** The large coinage of this state resembles the coinage of Connecticut and Vermont in that they are extensively collected by die varieties.

**NEW YORK.** An extremely rare variety of the Excelsior Cent exists with the eagle on shield facing right and a Reverse in which the eagle is large and the arrows and olive branch are transposed. (Crosby Pl. VII No. 24).

In a Unique example, the **LIBER NATUS LIBERTATEM DEFENDO** Obverse is muled with a **GEORGE III** Obverse.

Bolen struck extremely deceptive copies of the 1787 George Clinton, **Liber Natus** New York arms and the **Liber Natus Neo Eboracus** Cents. These copies are difficult to detect even when only slightly worn.

The 1789 Mott tokens are found on both thick and thin planchets and were probably struck for a few years after the year dated.

Several varieties exist of the 1794 Talbot, Allum and Lee Cents, many of which are quite rare. Pieces are known in Silver, and others have plain edges instead of the usual lettered edge. These tokens were struck in England at the time the rage for collecting the tokens of the series 1789-1798 prevailed. In order to increase the number of varieties and consequently the sale to collectors, many mules were made with British pieces and struck upon planchets the edges of which had been previously lettered.

Modern restrikes in Gold of the Castorland "Half Dollar" on a thin planchet are sometimes found. They were struck from the common "Restrike" or later dies.

**RHODE ISLAND.** Three varieties exist of the 1778-79 Ship token. One, with **VLUGTENDE** below Admiral Howe's flagship on the reverse, found only in brass; another, with scroll work substituted for the word

VLUGTENDE, in Silver, Copper, Brass and Pewter. The third variety is actually the first with the word VLUGTENDE removed.

FUGIO CENTS. Restrikes are known of the States United Cent in Silver and Bronze and can be distinguished by the extremely narrow rings upon the reverse. They were struck from dies discovered in New Haven, Conn.

IMMUNE COLUMBIA. A very clear copy of the 1785 Cent (Nova Constellatio) was made by Dr. Francis S. Edwards and is almost as rare as an original.

CONFEDERATIO CENTS. Bolen struck very deceptive copies of the rare Confederatio Cents, using an INIMICA TYRANNIS AMERICANA Obverse and two reverses, one with a small circle of stars and the other with a large circle. His work on these dies can be considered excellent when it is understood that three out of five specimens found in collections are proven to be samples of Bolen's work.

PITT TOKEN. The Pitt Halfpenny is known in Silver and Tin as well as in Copper. A small contemporary copy is known which is commonly identified as a Farthing. It is rare and found in both Brass and Copper.

BAR CENT. This famous token was superbly copied by Bolen who struck a number of pieces before disposing of the dies to W. E. Woodward. Mr. Woodward manufactured additional specimens before destroying the dies. Again, Bolen's work is quite deceptive and examples exist in both Silver and Bronze. Impressions from the original dies are said to also exist in Silver.

WASHINGTON PIECES. The 1783 Draped Bust Cent was restruck about 1860 by Lincoln, the famous London Numismatist, in Gold, Silver and Bronze, with both plain and engrailed edges. The reverse die of this coin is also found muled with the obverse of a token struck by W. J. Taylor and bearing the date 1851, with a Kangaroo facing right, and the name MELBOURNE above. The reverse of the Draped Bust Cent as used in this muling is the same as employed by Lincoln and differs materially from the original dies. These dies are still in existence and were sold together with a similar impaired set at the 1950 A.N.A. Convention.

The 1791 Washington Cent with the Small Eagle reverse is known with a edge reading PAYABLE AT MACCLESFIELD LIVERPOOL AND CONGLETON. An impression from the regular dies in Brass is also said to be known.

The reverse of the Liberty and Security Halfpenny is sometimes found muled with a Irish Halfpenny reverse in both Bronze and a White Metal composition.

The North Wales token is known in both Copper and Brass. A specimen exists with the edge reading PAYABLE IN LANCASTER LONDON OR BRISTOL.

\* \* \* \* \*

The Copies of the 1733 Rosa Americana Pattern Twopence; 1776 Continental Dollar; 1783 Nova Constellatio Patterns; 1787 Brasher Doubloon and the 1616 Sommer Islands Shilling are all far from accurate imitations and would not deceive even an unexperienced collector.

## Half Cents

The standard work on this subject is—The United States Half Cents by Ebenezer Gilbert. New York 1916.

Early dates 1793 to 1797 are becoming increasingly scarce in fine condition.

The punctuated date on 1795 is a comma-like die break after the 1.

1795 Plain edge without pole variety is often found struck over Talbot, Allum and Lee Cents of 1794.

The two varieties of 1796 rarely come in better than "good" condition.

1796. A beautiful copy of this rare date was manufactured by Dr. F. S. Edwards. It is but a weak imitation of the originals.

1797 lettered edge variety is a very rare coin and when found is usually in poor condition. Specimens are known with a "Gripped" edge not unlike the Cents of this year.

1797 plain edge variety frequently comes struck on planchets cut from early cents.

1806 large 6 variety is not uncommon in uncirculated condition.

Proof impressions are known of many of the later date Half Cents. Those usually found are 1832, 1833, 1834, 1835, 1850, 1851, 1854, 1855, 1856, 1857. All are Very Rare.

See listing under restrikes.

## Large Cents

The two absolute standard or basic works referring to this series are: EARLY AMERICAN CENTS 1793-1814. By William H. Sheldon M.D. New York 1949.

UNITED STATES COPPER CENTS 1816-1857. By Howard R. Newcomb. New York 1944.

Both Mr. Newcomb and Dr. Sheldon are responsible for the two finest works on Large Cents available. If a limited library is desired, these two references cover the entire Large Cent series admirably.

The following supplementary reference works are usually available—

The United States Coinage of 1793 Cents and Half Cents. By S. S. Crosby. Boston 1897.

A reprint was made of the plates in 1933.

The Cents of 1794. By Dr. E. Maris. Philadelphia 1869, 1870.

The Maris numbers have long been superseded by later writers, but many of the Maris names for the various varieties still survive and are sometimes found in authoritative sale catalogs and in old collections.

Varieties of U.S. Cents of the year 1794. By Frossard—Hays. New York 1893.

U.S. Cents of 1794. By Gilbert and Elder. New York 1910.

This work is actually a second edition of the Frossard—Hays publication and was illustrated from the collection of Ebenezer Gilbert of New York.

The United States Cents of the year 1794. By S. H. Chapman. Philadelphia 1926.

United States Cents of 1796. By Gilbert and Elder. New York 1909.

The United States Cents of the years 1795, 1796, 1797 and 1800. By Clapp and Newcomb. New York 1948.

United States Cents of 1798 and 1799. By George H. Clapp. 1931.

The United States Cents of the years 1801, 1802, 1803. By H. R. Newcomb. Detroit 1925.

United States Cents 1804 to 1814. By George H. Clapp. New York 1941.

Monograph of United States Cents and Half Cents, 1793-1857. By Ed Frossard. New York 1879.

The Cents of the United States. By F. W. Doughty. New York 1890.

A reprint of the last was made in 1934.

Both of the last above are generally considered comprehensive, but their present value is almost historical. The Maris work on 1794s as well as the Gilbert and Elder contribution on 1796s are both outdated and should only be considered as interesting additions to a library.

United States Cents 1816-1857. By F. D. Andrews. Vineland, N. J. 1881, 1883.

Several reprints have been made.

Values on early cents in very fine to uncirculated condition are very difficult to give as so much depends upon the striking, color and general appearance.

“Proof” Large Cents are Proofs so far as the common interpretation of the word is understood. They were all struck on highly polished and specially prepared planchets, and in many instances, from highly polished dies. It would be correct to call them “Specimens” or even “Presentation Pieces” as they were used to fill a demand created by foreign cabinets and as gifts to prominent individuals, politicians, members of congress and the like. Several are found in the rare Proof sets dated prior to 1857, a few of which appear from time to time. Proof impressions are known of the following dates; 1817, 1818, 1819, 1821, 1822, 1823, 1828, 1830, 1831, 1834, 1836, 1837, 1838, 1840, 1841, 1842, 1843, 1844, 1845, 1846, 1847, 1848, 1849, 1850, 1852, 1854, 1855, 1856, 1857. All are very rare.

1793. Two distinct varieties (Crosby 5D and 5E) of the famous strawberry leaf cents are known. The "Unique" variety (C 5D) was offered for sale late in 1950. Three, and perhaps even four, specimens exist of the comparatively common Crosby 5E die. One of these is in the collection of the American Numismatic Society. The origin of these pieces is not known. At one time or another, they have been identified as "Patterns," "Regularly issued pieces" or even contemporary counterfeits. All are from Poor to Very Fair condition.

1794. The earliest struck Cents of this year bear a decided resemblance to the Liberty Cap Cents of the preceding year. The Head of 93 can accurately be identified with the following 1794 Cents. Hays 1 (Sheldon 20), 2 (S-19a and S-19b), 3 (S-18a and 18b) and 4 (S-17).

The last issued 1794 Cents are almost duplicates of those struck in 1795 and can be found under the following Hays numbers—H 50 (S-69), 51 (S-70), 52 (S-71), 54 (S-67), 55 (S-68) and 56 (S-72). These varieties can accurately be designated as the Head of 1795.

Lettered edge variety

Plain edge variety

1795. Two varieties exist of the interesting Jefferson Head Cents. One is Unique, and bears a lettered edge, ONE HUNDRED FOR A DOLLAR. Several specimens exist of the other variety, all of which have a plain edge. However, the reverses, and possibly the obverse dies, of the two varieties are entirely different. While expert opinion regarding the history of these pieces differs, we have not included them in the catalog as they do not seem to be a product of the Mint. Cast copies exist of the plain edge Jefferson Head Cents.

1815. Cents were not struck in this year, but several clever alterations exist, most of which were manufactured from Cents dated 1813.

1818. A Cent of this year was described and partially illustrated in the Sale of the Maris collection, 1886, that had 14 Stars on the obverse and a continuous wreath, without a bow, upon the reverse. We do not know of it's present whereabouts, but presume it to be a counterfeit of the period.

1826 over 25. (Newcomb-Andrews 1) The top line of the 5 barely shows under the top curve of the 6.

1839 over 36. (Newcomb-Andrews 1) This coin is actually the Type of 1836 having plain hair cords. The "Overdate" is a die break. They are usually found in worn condition, but a few specimens are known Very Fine to Uncirculated. In such condition they command a very high price.

The various names given to the different types of 1839 Cents date back to early collecting days.

1844 over 81. (Newcomb-Andrews 2) This variety can be identified by outlines at the top of the 8 and final 4 of the date as well as by a curved line from near the right top of the first 4 of the date.

1846. The medium date variety is Newcomb-Andrews 11. While only one die represents this type, sufficient numbers are known to render the variety comparatively common.

### 1848 Small Date Cent

1848. Only four specimens are known of this rare and interesting coin. All are of good metal, and struck from dies, but the workmanship is not the standard of the U. S. Mint. It is believed that these coins are counterfeits of the period.

1851 over 81. (Newcomb-Andrews 3) This variety can be easily identified by the outlines of an 8 in back of the 5 and an inverted 1 in back of the last 1.

### Small Cents

The entire series of copper-nickel cents 1856 to 1864 often come in uncirculated condition with a brilliant proof-like surface. Real proofs have a sharp edge and must not be confused with such pieces.

1856 Flying Eagle Cent. This coin is really a pattern but has always been collected by cent collectors. No definite information seems to exist as to how many were struck but it is probable that the number was about one thousand. A hoard of some 400 or 500 pieces exists and may some day come on the market.

1857-1864. The composition of these cents was 88 parts copper and 12 parts nickel.

Recut dates of 1856, 57, 58 are often met with. They usually bring a slightly higher price than the regular dies.

1858 Flying eagle. In the large letter variety the base of the A in AMERICA touches the base of the M.

1858 Flying eagle. There are a good many die varieties of this coin and really more than two sizes of letters.

1894 Date recut. Rather scarce.

The bronze Indian head coins both uncirculated and proofs are usually toned in various color shades. Perfect bright red coins are very scarce and command a price well above catalogue.

The bronze cents from 1864 on are composed of 95 parts copper, 3 parts tin, 2 parts zinc.

1864 with L on ribbon for Longacre, the designer of the coin. The cut shows plainly where the L is found. This variety also exists with a recut date.

## Lincoln Cents

Proofs of this series are usually very unsatisfactory except those 1936 to 1942. The coins 1909 to 1916 have a surface almost the same as ordinary uncirculated specimens but the edge is sharp. As these early dates were often in the white mint wrappers for several years they are generally badly discolored.

1909 Lincoln. First issue has the initials VDB at the lower part of reverse.

1922 D mint. Poorly struck specimens exist showing the D very faintly or not at all.

Uncirculated cents before 1935 should not be expected in bright red condition, they are usually toned to various shades.

Cents from the S and D mints, particularly those between 1922 and 1930, are frequently poorly struck and really sharp specimens of this period are unusual.

The zinc-steel cents coined in 1943 were struck in steel with a zinc coating of 0.0005 inch. They were extremely unpopular.

## Two Cent Pieces

1864 Small motto. The letters are small and block like while the large letters are of an entirely different form.

Proofs of 1864, 65, 66 are rarely found brilliant but are usually a rather dull color.

## Nickel Three Cents

1865 often shows a recut date.

The composition is 75 parts copper and 25 parts nickel.

1887 over 86. This is not a very clear over date. The outside lower curve of 6 shows at left of 7.

## Nickel Five Cents

The composition of the 5 cent pieces from 1866 to 1942 is 75 parts copper and 25 parts nickel. The coin authorized on March 27, 1942 has the following content—copper 56, silver 35, manganese 9.

Not all proofs of this series are of the same brilliance. Some dates in the 80's or 90's merely have a frosty like appearance but can be identified as proofs by their sharp edge.

1937 D. Some poorly struck pieces of this date give the buffalo the appearance of having only three legs.

1939. Coins of this date have been found with the words MONTICELLO and FIVE CENTS re-engraved.

The buffalo type nickels of the S and D mints are usually not as well struck as the P mint coins. The high relief on Indian head and on buffalo gives an appearance of flatness. The mint marks are often mere blobs. Well struck coins of some dates are almost unknown.

## Half Dimes

The standard work on this subject is—The United States Half Dimes by D. W. Valentine. New York 1931 (American Numismatic Society).

## Dimes

1796. One of the commonest varieties of this date shows a lumpy die break at left of date.

1798 over 97. There are two reverse dies combined with this obverse, one having 13 stars above eagle (the rarest) and the other 16 stars.

1798. Perfect date. Two distinct varieties of obverse, one with very small 8, the other with an average size 8.

1804. Two varieties of reverse, with either 13 or 14 stars above eagle.

1805. Two reverse varieties. With either 4 or 5 berries on olive branch in eagle's claw.

## Twenty Cent Pieces

1876 CC. While the mint records show a substantial number were coined less than ten specimens are known. All of these with one exception are in mint condition.

## Quarter Dollars

The standard work on this subject is—The Early Quarter Dollars of the United States, 1796-1838. By A. W. Browning. Unfortunately only 50 copies were issued.

1822. 25 over 50 variety. The engraver made an error and first cut 50 instead of 25 as value on reverse.

1827. See under restrikes.

The same reverse was used in 1828.

The entire series of "Liberty standing" quarters is difficult to get well struck up. The head is usually rather indefinite. The two coins of the first type 1916, 1917 have the best dies.

During 1934 a slight change was made in the obverse die of the Washington quarter the motto being engraved in much heavier lettering. The coinage of the first part of the year was in the same style as on the 1932 coin, the motto being in rather lightly engraved letters. These seem to be much scarcer than the later type.

## Half Dollars

The standard work is—A Register of Half Dollar Die Varieties and Sub-Varieties. By M. L. Beistle. Shippensburg, Pa. 1929.

1794, 1795. There are several varieties of the first date and over 30 varieties of 1795. All are listed and illustrated in the Beistle work.

1807. 50 over 20 variety. The engraver made an error on first figure of value on reverse and first cut a 2 instead of a 5 in 50.

1832 Large letters on reverse. May be quickly identified by the heavy die break across eagle's wing.

The S mint half dollars 1858 to 1865 show three distinct sizes of S.

## Silver Dollars

The standard work is—The United States Early Silver Dollars from 1794 to 1803. By M. H. Bolender. Freeport, Ill. 1950.

Supplementary information is available in the Haseltine Type Table Catalog of U. S. Dollars, Half Dollars and Quarter Dollars. By J. W. Haseltine. Philadelphia 1881.

1836, 1838, 1839. While these have generally been accepted as part of a collection of dollars they are really the first patterns of the Gobrecht design regularly adopted in 1840. Several authorities have tried to prove the comparatively common 1836 GOBRECHT on base, plain edge variety as a regular issue. It is an absolute pattern as the law authorizing the established weight of this piece was dated January 18, 1837.

1845. A rare variety exists of the dollar of this year with the "84" in date heavily recut.

1846. Two varieties exist of the re-engraved date dollar, one obviously cut over 1844. Both are of great rarity and generally are found in Proof condition.

1851. It is believed that Restrikes of this date were made in the late sixties at the U. S. Mint.

1852. This date is also said to have been restruck.

1873 S. Continued references are made to this coin, but we doubt if an authentic specimen exists.

1879 O. Claims are made that 12 pieces were struck in Proof at the New Orleans mint.

1883 O. Twelve specimens of this date are also said to have been struck in Proof at New Orleans.

1921. The Morgan Dollar "Proofs" of this date are genuine Proof impressions and not merely early strikes from the die.

## United States Gold Coins

Where an unusually small coinage occurs we have placed the number in brackets after the date. Early dates of 1795 to 1834 are quoted only in very fine condition. Worn specimens sell for less and really uncirculated pieces bring a great deal more.

### Gold Proofs

This rare series represents the "de luxe" group of a United States coin collection. The mint records show that only a small quantity of sets were made in any year and those of the period before 1885 are very rare. Proofs before 1908 are struck on polished planchets and presents a mirror-like appearance. The new coins struck in 1908 were made with the new sand blast finish adopted some years before in the French mint.

### Gold Dollars

1849. Open and close wreath. The first issues of this year have a wreath with branches spread wide. In the latter part of the year the type shows the branches drawn up to the top close to figure.

The records of the Charlotte mint show a coinage of 4 pieces in 1854, but no specimen is known. It is probable that they were dollars of 1853 delivered by the coiner in 1854.

1855 C, D, O. The 8 in date is very weak and barely shows on any of these dates. The 1855 D is the poorest struck.

The Dahlonega mint shows a coinage of 1,566 pieces in 1860 but none in 1861. It is probable that the fiscal year includes both dates.

### Quarter Eagles

1834 with motto over eagle is one of the great rarities. Probably not over a dozen are known.

No mint record exists of a coinage in 1841 but 2 or 3 specimens have turned up in proof sets of that year. One or two others are known, that are evidently impaired proofs showing circulation.

1845 O. While there is no mint record of coinage a number of specimens have turned up and the coin is now usually obtainable.

A small quantity of 1848 coins were stamped CAL over eagle to indicate that they were struck from the first California gold received at the mint.

### Three Dollar Pieces

The mint record of the rare dates is evidently confused as 1873 is not nearly as rare as indicated by the coinage record and at least 30 specimens are known of 1875.

1856 S. Large and small mint mark S of which the smaller is much the scarcest.

1870 S. Only two specimens of this coin were struck. One remains in the cornerstone of the San Francisco mint, the other is in a private collection.

### Half Eagles

The many great rarities in this series would make a story by themselves. Only a very small number of specimens are known of such dates as 1798 small eagle, 1815, 1819, 1821, 1822, 1824, 1827, 1828, 1829, 1832.

1822. Only three specimens are known of this coin, one being in the U. S. Mint Collection.

1832. Curled 2, 12 stars is one of the rarest U. S. coins. The editor knows of only three pieces.

We have seen one or two coins dated 1916 evidently of the Philadelphia mint but are not convinced they are not S mint pieces poorly struck so that S does not show.

## Eagles

The demand for the first types 1795 to 1804 continues unabated. Prices seem well stabilized. We have given a valuation on the dates 1838 to 1854 only in very fine condition as uncirculated specimens are rarely met with and those of a lesser grade seldom collected.

The St. Gauden's design in 1907 has as interesting varieties as the double eagles. Of the variety with periods and rolled edge only 50 are said to have been struck while the same variety with sharp wire edge is said to have been coined to the extent of 500 pieces.

The St. Gauden's type eagle adopted in 1907 has 46 stars on edge up to and including 1911. From 1912 to 1933 there are 48 stars.

The 1933 eagle is quite a rare piece and probably not over 25 specimens exist.

## Double Eagles

Twenty Dollar pieces of the 19th century are very unusual in really uncirculated condition. These coins were made to use and are usually nicked and scratched by being in bags.

The St. Gauden's type produced in 1907 brought forth a number of interesting varieties. Some of the dates are of extreme rarity especially some of the branch mints. All specimens of the 1933 coin have finally been ordered returned to the Treasury Dept. by the U. S. Secret Service on the ground that they were not legally released by the mint.

The St. Gauden's type double eagle first struck in 1907 has 46 stars on the obverse up to and including 1911. From 1912 to 1933 there are 48 stars on obverse.

## Private Gold Coins

We have adopted a system of valuing this series in very fine condition only. Private gold coins in uncirculated condition are very rare and command high prices when offered.

## California Gold

Small gold coins were privately struck for use in California from 1852 to 1881 but they were more in the nature of souvenirs and were not in general use. Certain charms in imitation of these coins are still sold in western curio shops.

## RESTRICKES OF UNITED STATES COINS

By John J. Ford, Jr. & Walter Breen

This list represents an initial attempt at listing the various restricks of U. S. coins made from dies intended for regular coinage, or from mint made dies extremely similar to those regularly used. While a large number of U. S. Pattern pieces were restruck, we have made no attempt to list them here. Nor, have we given any consideration to doubtful pieces or items that could properly be called "Pieces de Caprice." All of the following were manufactured from genuine mint dies either officially, semi-officially or privately. Many were intended for purposes of fraud or personal profit. For those reasons, information is very difficult to secure and the number of future additions to this list must necessarily be limited.

1803 HALF EAGLE. Regular dies. Copper. (A.W. No. 21). Struck from rusted dies, probably during the period, 1858-63.

1804 HALF EAGLE. Regular dies. Silver, Copper, W. Metal. The Silver and Copper impressions are known as A.W. No. 24 and No. 25. J. Mickley, of Philadelphia, struck the White Metal (Tin) pieces before 1878 from the genuine dies. It is believed that he was also responsible for the Silver and Copper specimens. The latter probably of the period 1858-63.

1805 HALF EAGLE. Regular dies. Silver, Copper. Struck from rusty dies. It is almost certain that these and the following mules were not of mint origin.

MULE. Obverse. 1805 HALF EAGLE. R Eagle on full U. S. Shield. Dies rusty as above. Only known in Copper, but specimens may exist in White Metal.

MULE. Obverse. 1805 HALF EAGLE. R Eagle on a rock. Dies also rusty and only reported in Copper. The two reverse dies mentioned above are part of a series of four similar items discovered by Dr. Dickeson, of Philadelphia, about 1860, who had impressions made together with a newly cut reverse die that announced it's obverse was a "TRIAL PIECE DESIGNED FOR UNITED STATES CENT. 1792."

1808 HALF EAGLE. Obverse. Regular dies. R Heraldic Eagle. (Type regularly used 1798-1807) Silver. Plain and Reeded edges. Listed as A.W. No. 27 and No. 28 without any mention of the muled reverse. It is not known if these pieces are of Mint origin, but it is assumed that they are of the period, 1858-63. Specimens with the reeded edge are the rarest.

1801 SILVER DOLLAR. Obverse. Similar to original dies but the date is entirely different being from more modern type punches. The reverse is that of the "Original" or First Reverse 1804 Dollar.

1802 SILVER DOLLAR. Obverse as last, but 2 in date is entirely different being curled at the top. Reverse as last. The 1802 Restrike Silver Dollar is commoner than either the 1801 or 1803.

1803 SILVER DOLLAR. Obverse. Similar, but not identical with any original die of this year. Reverse as last. All specimens known of the 1801, 1802 and 1803 Silver Dollar Restrikes are in brilliant proof condition. It is generally believed that they were struck between 1860 and 1868.

1804 SILVER DOLLAR. Second Reverse. Plain edge. Silver. Struck in 1858. Two specimens supposedly known.

1804 SILVER DOLLAR. Second Reverse. Lettered edge. Silver. Probably struck between 1866 and 1876.

1806 HALF DOLLAR. Regular dies. Obverse only struck on a large, heavy flan. White Metal. The die from which the above piece was made is now in the collection of the American Numismatic Society.

1822 HALF DOLLAR. Regular dies. Obverse only struck in Copper. Plain edge. Three said to have been struck just prior to destruction of the dies, probably 1858-63.

1823 HALF DOLLAR. Regular dies. Copper. Plain edge.

1827 QUARTER DOLLAR. Obverse. Regular dies. Reverse. 1819 Browning No. 2. (Square based 2) Silver. Copper. Struck from rusty dies undoubtedly at the Mint prior to 1868.

1800 HALF DIME. Exceedingly high relief. Obverse only struck in Copper. Believed to be a mint product struck between 1829-37 or later, 1858-63.

1864 HALF DIME. Similar dies to original. Copper. Listed as A.W. No. 449. The obverse of these pieces was made from a worn hub only found on the dies of 1871 (All but one) and 1872-3 Half Dimes. The regular dies were undoubtedly destroyed in 1868, but the hub was still extant and the "Trials" struck to order.

1864 THREE CENTS SILVER. Similar dies to original. Copper. See the note following the 1864 H. Dime in Copper. Entirely different from the regular dies, though similar. A hoard of over 35 pieces was broken up about ten years ago.

1804 CENT. Obverse. 1803 (Sheldon No. 261) badly rusted and broken, re-engraved to 1804. Reverse. An 1820 die rusted badly, reground. Copper. White Metal (Tin). Believed to have been struck in the mint, unofficially, about 1860. Uniface specimens of both obverse and reverse in White Metal have been reported. Impressions vary greatly in state of rustiness and other defects.

1810 CENT. Obverse. Presumably one of the regular dies for the year. (S-285). Reverse. Identical to that of the 1804 Restrike Cent. Tin. (White Metal). Struck from badly rusted dies. Only two specimens said to be known.

1818 CENT. Obverse. Quarter Dollar of 1818. (Browning No. 2). Reverse. Cent of 1818 (N.A. 8) reengraved. Reeded edge. Silver. Struck from rusty dies.

1823 CENT. Obverse. Newcomb 2 of 1823. Reverse. Believed to be one of 1813 but reengraved. Silver. Copper. Struck before 1863 from dies unearthed in New York as old iron. Credit is given to one Miller of 7th Street, Philadelphia, for actually striking the coins. The dies later came into the possession of J. W. Haseltine where they were found and defaced by C. Steigerwalt. They are said to still be in existence. Specimens examined show various stages of the broken dies. The Silver pieces are Very Rare.

1811 HALF CENT. Obverse. Gilbert No. 1 of 1811. Reverse. Gilbert No. 1 of 1802. Copper. Struck by J. Mickley of Philadelphia and first offered for sale in 1863.

1831 HALF CENT. Similar to the "Original" piece with the large Berry reverse, but from a different die. High leaves terminate at the left side of "S" and the die is cracked from border between "TE" to wreath and from border downwards through F to L, between "NT" to wreath. Proof.

1831 HALF CENT. Reverse similar to that of 1852. Small Berries. Proof.

1836 HALF CENT. Similar to the "Original" piece with the Large Berry reverse, but from a different die. The reverse shows bulging and is somewhat convex. Proof.

1836 HALF CENT Reverse similar to that of 1852. Small Berries. Proof.

1840 HALF CENT. Small Berries. Proof.

1841 HALF CENT. Small Berries. Proof.

1842 HALF CENT. Small Berries. Proof.

1843 HALF CENT. Small Berries. Proof.

1844 HALF CENT. Small Berries. Proof.

1845 HALF CENT. Small Berries. Proof.

1846 HALF CENT. Small Berries. Proof.

1847 HALF CENT. Small Berries. Proof.

1848 HALF CENT. Small Berries. Proof.

1849 HALF CENT. Small date. Small berries. Proof.

1852 HALF CENT. Small Berries. Proof.

The Half Cent pieces, 1831 to 1852, are held in somewhat higher esteem than the other pieces listed as it is commonly believed that they were struck in the Mint under semi-official sanction. It is also believed that but 18 specimens were struck of each date in this series, about 1858. As the relative rarity of the various dates differs somewhat, this information may be in error.

PROOF COINS STRUCK IN THE PHILADELPHIA MINT  
1863-1942

As reported by the Director of the Mint

GOLD PROOFS 1865—1889

Date	\$20	\$10	\$5	\$3	\$2½	\$1
1865	25	25	25	25	25	25
1866	30	30	30	30	30	30
1867	50	50	50	50	50	50

<sup>1</sup> Composition—Percent.  
5 and 3 cent (nickel)—copper, 75; nickel, 25.  
5 cent (silver)—copper, 56; silver, 35; manganese, 9. First coined October 1942.  
2 and 1 cent (bronze)—copper, 95; tin and zinc, 5.  
1 and ½ cent (copper)—all copper.  
1 cent (nickel)—copper, 88; nickel, 12.  
1 cent (zinc-steel)—steel with zinc coating each side, 0.0005 inch. Coined during calendar year 1943.  
1 cent—copper 70; zinc 30. First coined January 1944.  
<sup>2</sup> 3-cent piece discontinued by act of Sept. 26, 1890.  
<sup>3</sup> 2-cent piece discontinued by act of Feb. 12, 1873.  
<sup>4</sup> Proclamation of the President in conformity with act of Mar. 3, 1795.  
<sup>5</sup> Copper cents and half cents discontinued by act of Feb. 21, 1857.  
<sup>6</sup> Nickel cents discontinued by act of Apr. 22, 1864.  
\*For U. S. coinage by calendar years 1793-1943, see Annual Report for 1944, pp. 66-73.

**Domestic Coin Manufactured by Mints of the United States  
Since Organization to Include the Year 1935**

**Tabulation of the coinage 1936 to 1949 follows by years**

---

Coinage during the early years is not susceptible of exact statement by years of actual date on coin, the registry of annual coinage being of coin delivered by the coining departments of mints within the given year, and these deliveries not having been invariably completed within the year of the date on coin as now required.

The following pages are reprinted from the pamphlet "Domestic Coin Manufactured by Mints of the United States" compiled by the office of the Director of the Mint.

For sale by the Superintendent of Documents, Washington, D. C.  
Price 5 Cents.

Also available at the same source and price—

"Information relating to United States Coins and Medals." Prepared under direction of the Director of the mint.
